

USUAL ORDER PROCESS

In most cases you will need all three components: the seat (1), a matching seat adaptor / console (2), and seat rails / sliders (3). Choose components that are suitable for your vehicle and seat combination.

SEAT

1

Choose the seat you prefer and confirm that it is suitable for your car. For many vehicles, use the recommended seat adaptor guidance; otherwise check the specified dimensions and weight requirements.

SEAT ADAPTOR

2

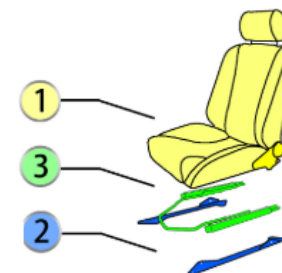

Select the vehicle-specific seat adaptor / console required for your model and year. If your vehicle is not listed, contact DESIGN911 - there is often still a suitable solution.

SEAT RAIL / SLIDER

3

Seat rails allow fore-and-aft adjustment of the seat. In most installations you will need the matching seat rails as well as the seat adaptor, so remember to order both unless stated otherwise.

TYPICAL COMPONENT STACK

- 1 Seat
- 2 Seat adaptor
- 3 Seat rail / slider

ORDER CHECK SEAT + SEAT ADAPTOR + SEAT RAILS / SLIDERS
