

KW DLC Airsuspension – W-LAN Module / App-control

The KW DLC App is compatible with Apple iPhone, Apple iPod touch and Apple iPad. It allows you to lower the car in single millimetre steps within the suggested adjustment range via the ADCANCED menu. To control the KW DLC via the App an optional W-LAN module is required. With the KW DLC App you are able to save your preferred individual height settings in the App menu "Personal". You are able to share these saved settings with your friends via eMail. With the App-control you can not only save your own setups but on request you can also activate or deactivate the lowering KW DLC module. This can be done simply by the push of a button.

SETUP OPTIONS WITH THE KW DLC AIRSUSPENSION APP

The KW DLC Airsuspension App is available for free in the App store

BASIC

In the menu "Basic" of the KW DLC App you can activate or deactivate the electronic lowering of your air suspension easily via your iPhone, iPad or your iPod touch.

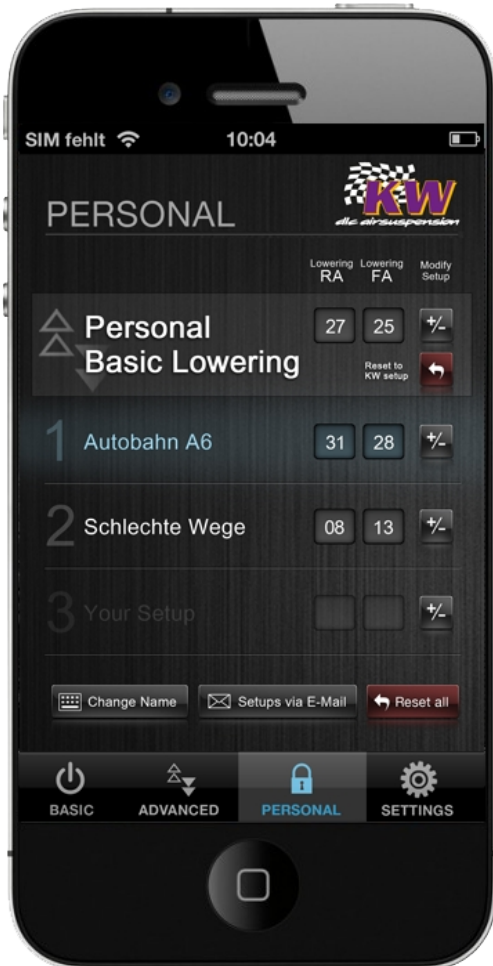

ADVANCED

Via the menu "Advanced" in the KW DLC App you can adjust the level of the electronic lowering in single millimetre steps. The lowering can be adjusted on each axle separately. For example you can consider heavy loads in case you want to tow a trailer or caravan.

PERSONAL

In the menu "Personal" you can save your individual lowering setups and you can also share them with your friends via eMail.

SETTINGS

In the menu "Settings" you can chose from different App design backgrounds and connect your iPhone, iPad or iPod touch with the KW W-LAN module.
